

Decades of Commitment for a Sustainable Future

The paper industry is working to capture even more paper from the waste stream for recycling.

Investing to Improve Paper Recycling Rates

Investing in and improving paper recycling has been an industry priority for decades. AF&PA members are working to advance the circular value chain.

We joined the U.S. EPA and others pledging support to solve issues facing the U.S. recycling system.

Voluntary Goal Setting

The U.S. paper industry set its first recycling goal in 1990 to improve paper recycling rates. As recycling rates increased, our industry continued to set new goals.

We recycle nearly 60% more paper today than we did in 1990.

Industry MRF Ownership

We have an ownership stake in the recycling system.

AF&PA members own and operate more than 100 materials recovery facilities (MRFs) nationwide. That's where your recyclables are sorted and processed.

Increasing the Use of Recycled Paper

Our members set a goal to **increase the use of secondary materials like recycled paper** in new paper products to 50% by 2030. They also aim to increase the percentage of our products that are recyclable or compostable.

Additionally, since 2019, our industry has announced or is expected to complete projects by 2025 that will use more than 9 million tons of recycled paper.

Projects include building new mills, converting or expanding existing mills, and updating machinery and equipment.

Investing in Recycling Education

In the 1990s, AF&PA created a program to help promote paper recycling in the U.S., which is still ongoing today.

We continue to provide resources and conduct research to help capture more paper from the waste stream for recycling.

- 01** We developed a tool, AF&PA's **Design Guidance for Recyclability**. The Design Guidance helps packaging manufacturers, designers and brands create and manufacture packaging that helps to meet their recyclability goals.
- 02** Additionally, our industry tested and found **pizza boxes and all-paper padded mailers can be successfully recycled at paper mills**. We developed language to share with stakeholders to help ensure more of these materials are captured from the waste stream.
- 03** AF&PA works with stakeholders and partners to **increase recycling access and improve education**. For example, we are a member of the Paper Cup Alliance, which works to increase paper cup recycling in the U.S.
- 04** We publish **Recycling Q&As** to help increase knowledge and awareness of how to recycle common paper products.

About AF&PA

The American Forest & Paper Association (AF&PA) serves to advance public policies that foster economic growth, job creation and global competitiveness for a vital sector that makes the essential paper and packaging products Americans use every day. The U.S. forest products industry employs more than 925,000 people, largely in rural America, and is among the top 10 manufacturing sector employers in 44 states. Our industry accounts for approximately 4.7% of the total U.S. manufacturing GDP, manufacturing more than \$435 billion in products annually. AF&PA member companies are significant producers and users of renewable biomass energy and are committed to making sustainable products for a sustainable future through the industry's decades-long initiative — **Better Practices, Better Planet 2030**.
